

Assignment 9

Problem Statement

Voice chat bots application in different domains in python.

Areas to explore:

- Medical and Healthcare
- Tourism
- Fashion
- Insurance Advisory
- Banking
- Customer Service for any e-commerce

Choose any one industry. This is an individual assignment.

Few points:

1. Prepare sets of possible questions for the user, make sure you take the input through speech using any python library.
2. Try to use any pre-trained ML model based on the user inputs.
3. Continue the communication until the user says bye, thank you or etc.
